Reviving our Heritage!

## ABOUT KANSYAM

Kansyam is one-of-a-kind Company, that manufactures bronze or pure kansa kitchenware, serveware, religious products and healthcare products.

The brainchild of Shri. Amit Bhogilal Shah, Kansyam was founded under his steadfast vision in 1990, to make the benefits of bronze available in every home. He was a visionary who understood the significance of the Sanskrit phrase - "कंस्यम बुद्धिर्विक्रमम्" meaning that the Kansa metal sharpens our intellect.

Certified by the best, our bronzeware is US FDA approved and has passed the stringent NaBL RoHs test.

---

**Our Mission:** To assist our clients to achieve the highest quality of living possible, enhancing the wellbeing of the wider community by making bronze ware an experience, a culture, a way of life.

**Our Vision:** His vision includes evolving our brand to better communicate the breadth of expertise that Kansyam truly represents and realign with our refined value proposition and vision.

## VIRAL SHAH (CEO)

Taking the vision of his father forward, Viral Shah is driven by professionalism, competence and integrity towards delivering the most unrivalled utility to our clients.

# Ayurveda

Kansa, unlike a lot of other metals that might seem “convenient,” offers Ayurvedic health benefits that are unparalleled.

“Ayurveda Prakasha” is one of the important ancient texts on ancient Indian Alchemy written by Shrimad Madhava Upadhyaya in circa 16th-17th century AD, which provides ample statements about the health benefits of Kansa. In the Sanskrit alchemical work “Rasaratna Samucchay,” there is significant information about the healing properties on Kansa.

ayurveda

In the 5th century, Ayurvedic scientist Charaka stated that eating and cooking in Kansa utensils, which have been made with the correct ratio of copper and tin, balances the body’s pH level.

Kansa is the best metal to which you should make the switch, because of its sustainable nature and health properties.

## Kansa

Pure Kansa is an Indian name for bell metal or bronze. An ultra-superior metal, Kansa is an alloy which is created with a 4:1 proportion of copper and tin, typically 78% copper and 22% tin. It is over three thousand years old, being used since the Golden Age of Ayurveda : the Samhita Kala, a testament to our heritage and our roots.

A malleable metal in itself, the prepared alloy is further moulded into handcrafted products and can acquire different kinds of finishes – matt or glossy, depending on the aesthetic preferences.

# KANSA

## A ROYAL METAL

Archaeological evidence so far proves that the metallic culture in India is as old as the Indus Valley Civilization. As steel and iron became more affordable, bronze found itself as part of the royal family. Kansa dining ware has been used since the period of Samhita Kala and it brings phenomenal changes in human life.

Bronze supersedes gold and silver on the grounds that it is the only metal that can be cooked in.

## B2C

We pride ourselves on giving a modern spin to our traditions, blending traditional culinary with visual aesthetics.

You can browse through our curated collections, select the ones that best fit into your theme, and place your order online or simply walk in one of our various stores and experience our products first-hand.
